Child: "Tyro Muhammed"

Problem

1 IN 5

of every out-of-school
child in the world

18.3 M

out-of-school children
in Nigeria alone in 2024

From Barriers to Bridges

MAPPING BARRIERS TO EDUCATIONAL ACCESS FOR
CHILDREN IN LAGOS, NIGERIA

PRESENTERS: NAOMI IVIE, AMBER BRETZ, KAYA WALTZER

Barrier #1

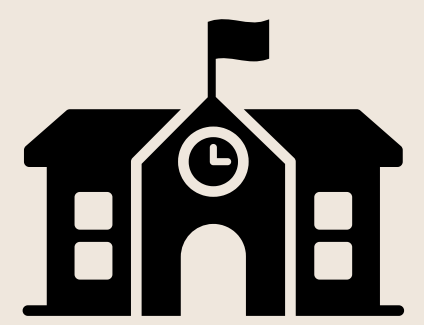

POVERTY & THE NEED FOR INCOME

15 M +
Working Children

2 M +

Working 15 or more
hours daily

6 M +
working children
not in school

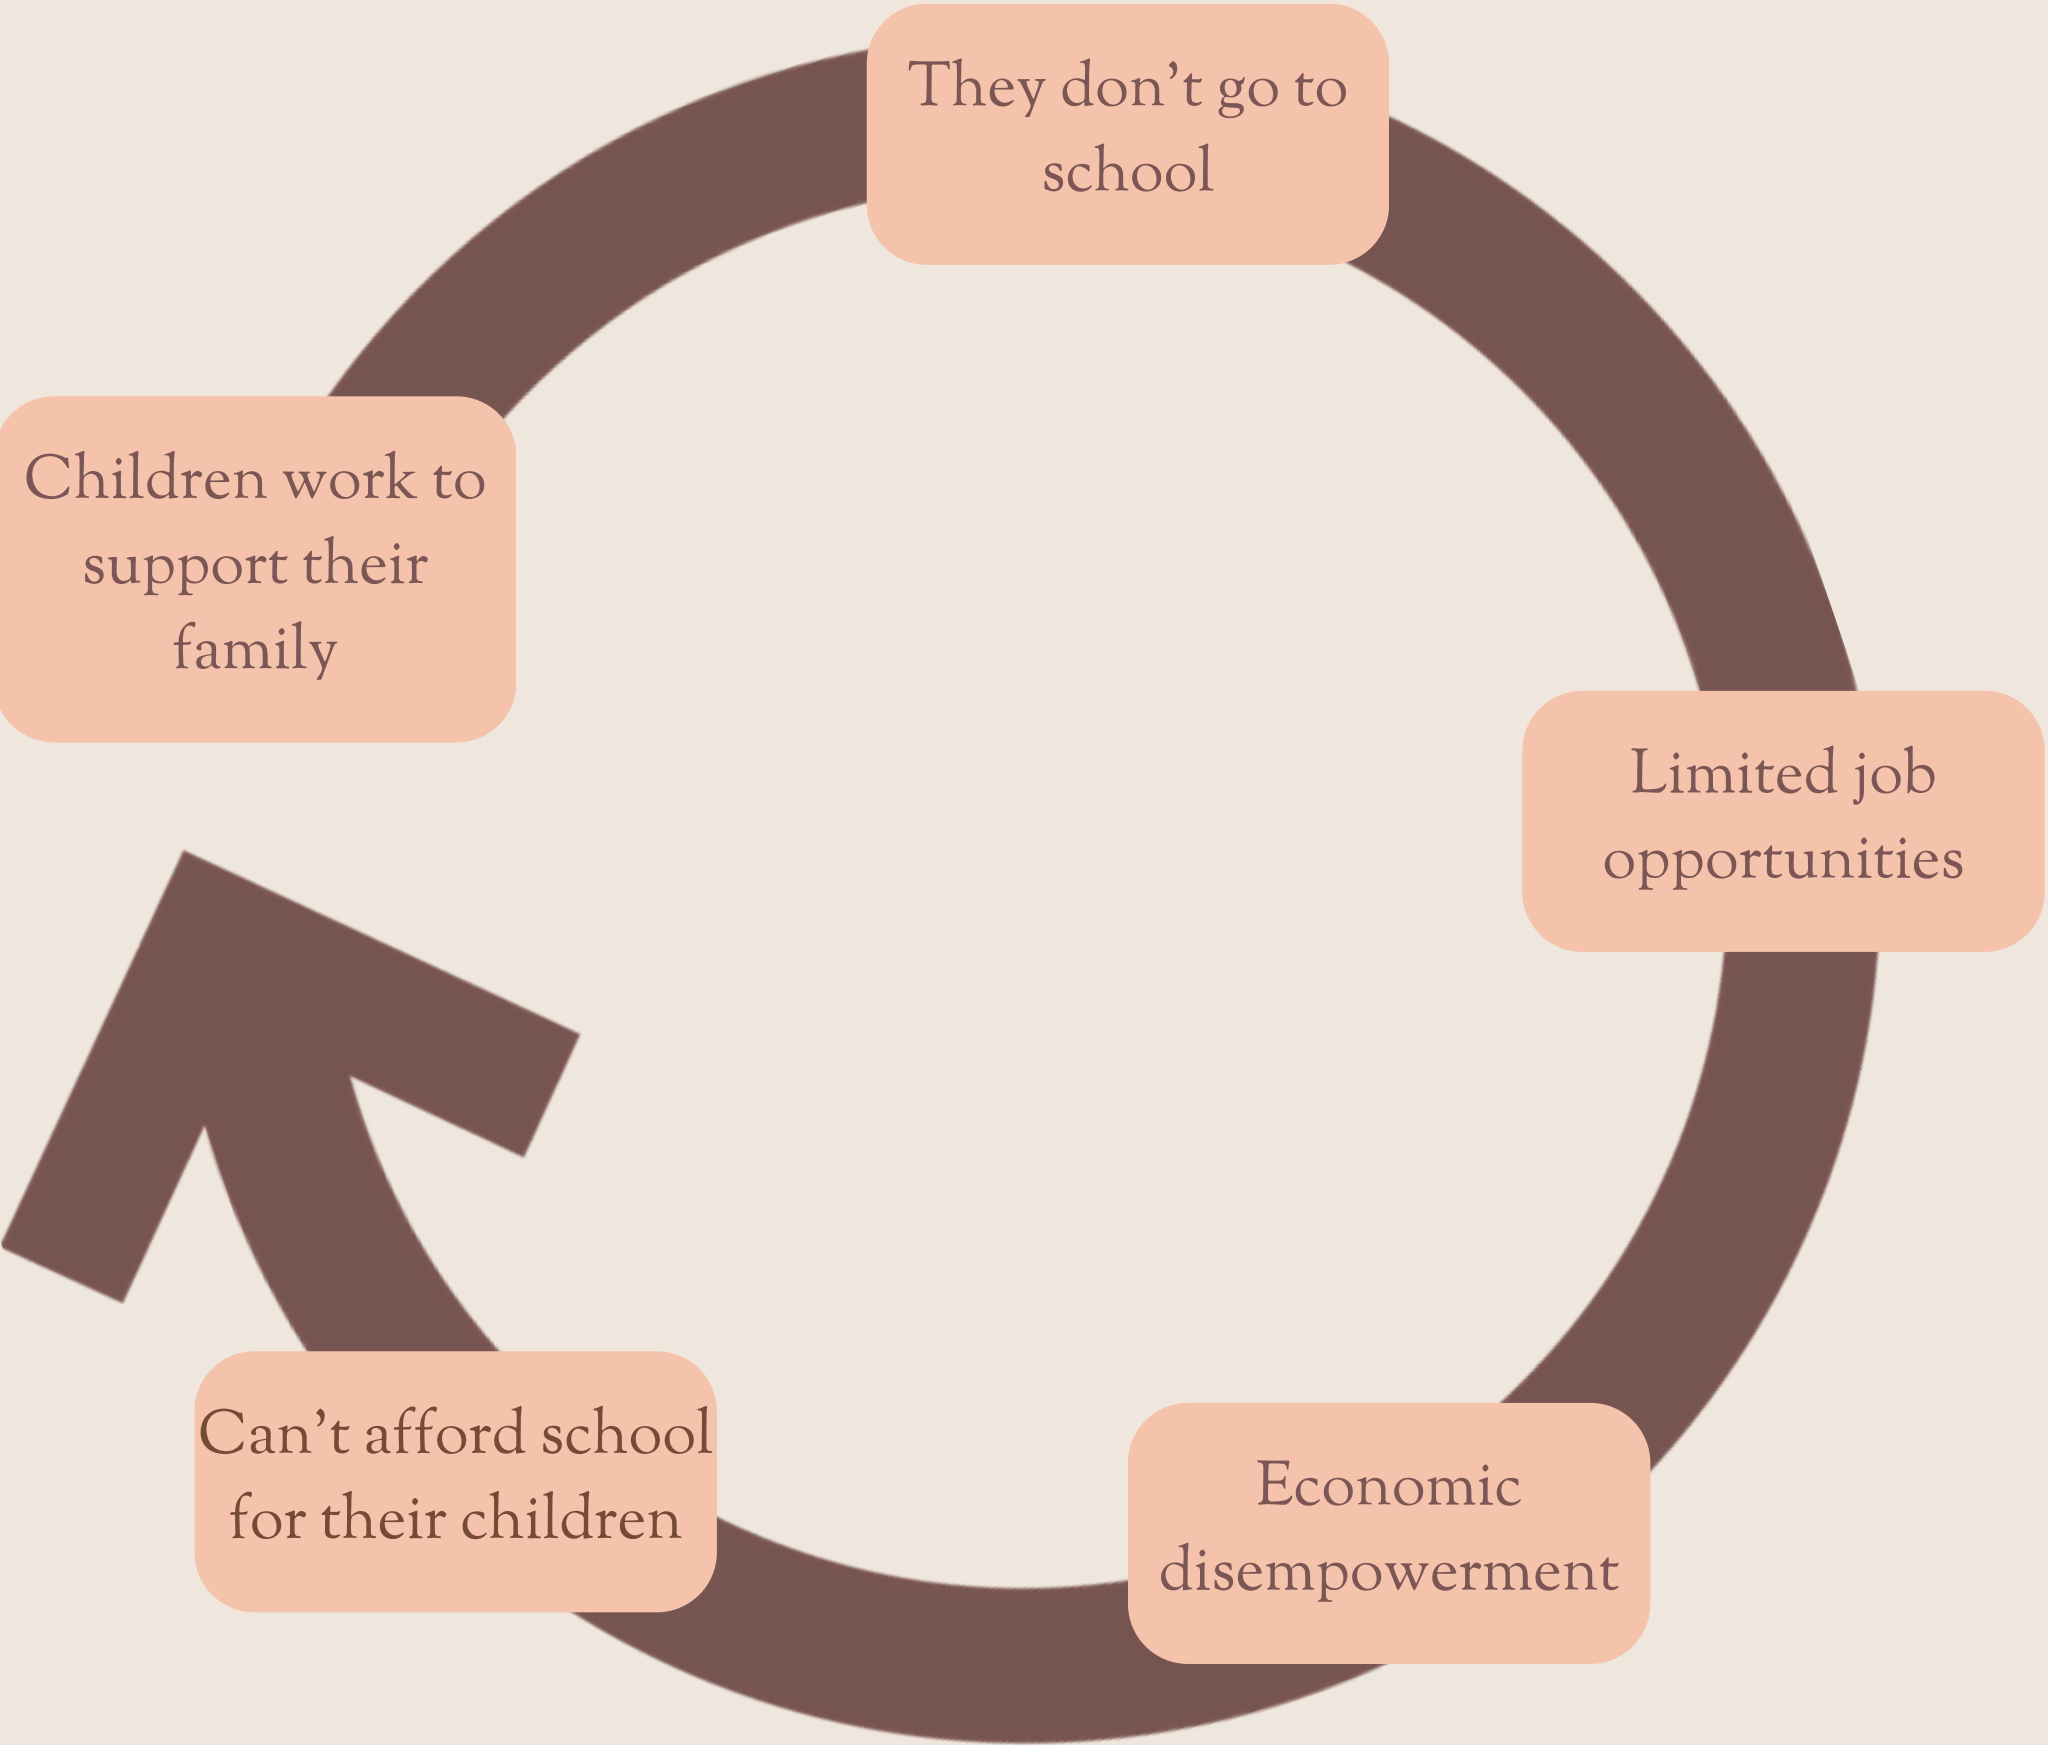

40 %

of individuals earned
less than 85 USD per
year in 2024

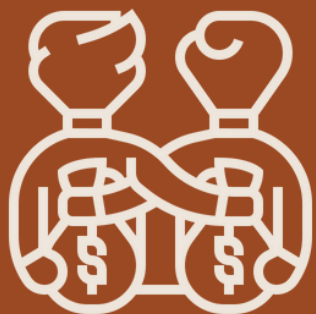

#1

Generational Poverty

Barrier #2

GOVERNMENT INEPTITUDE

+ 10 +

=

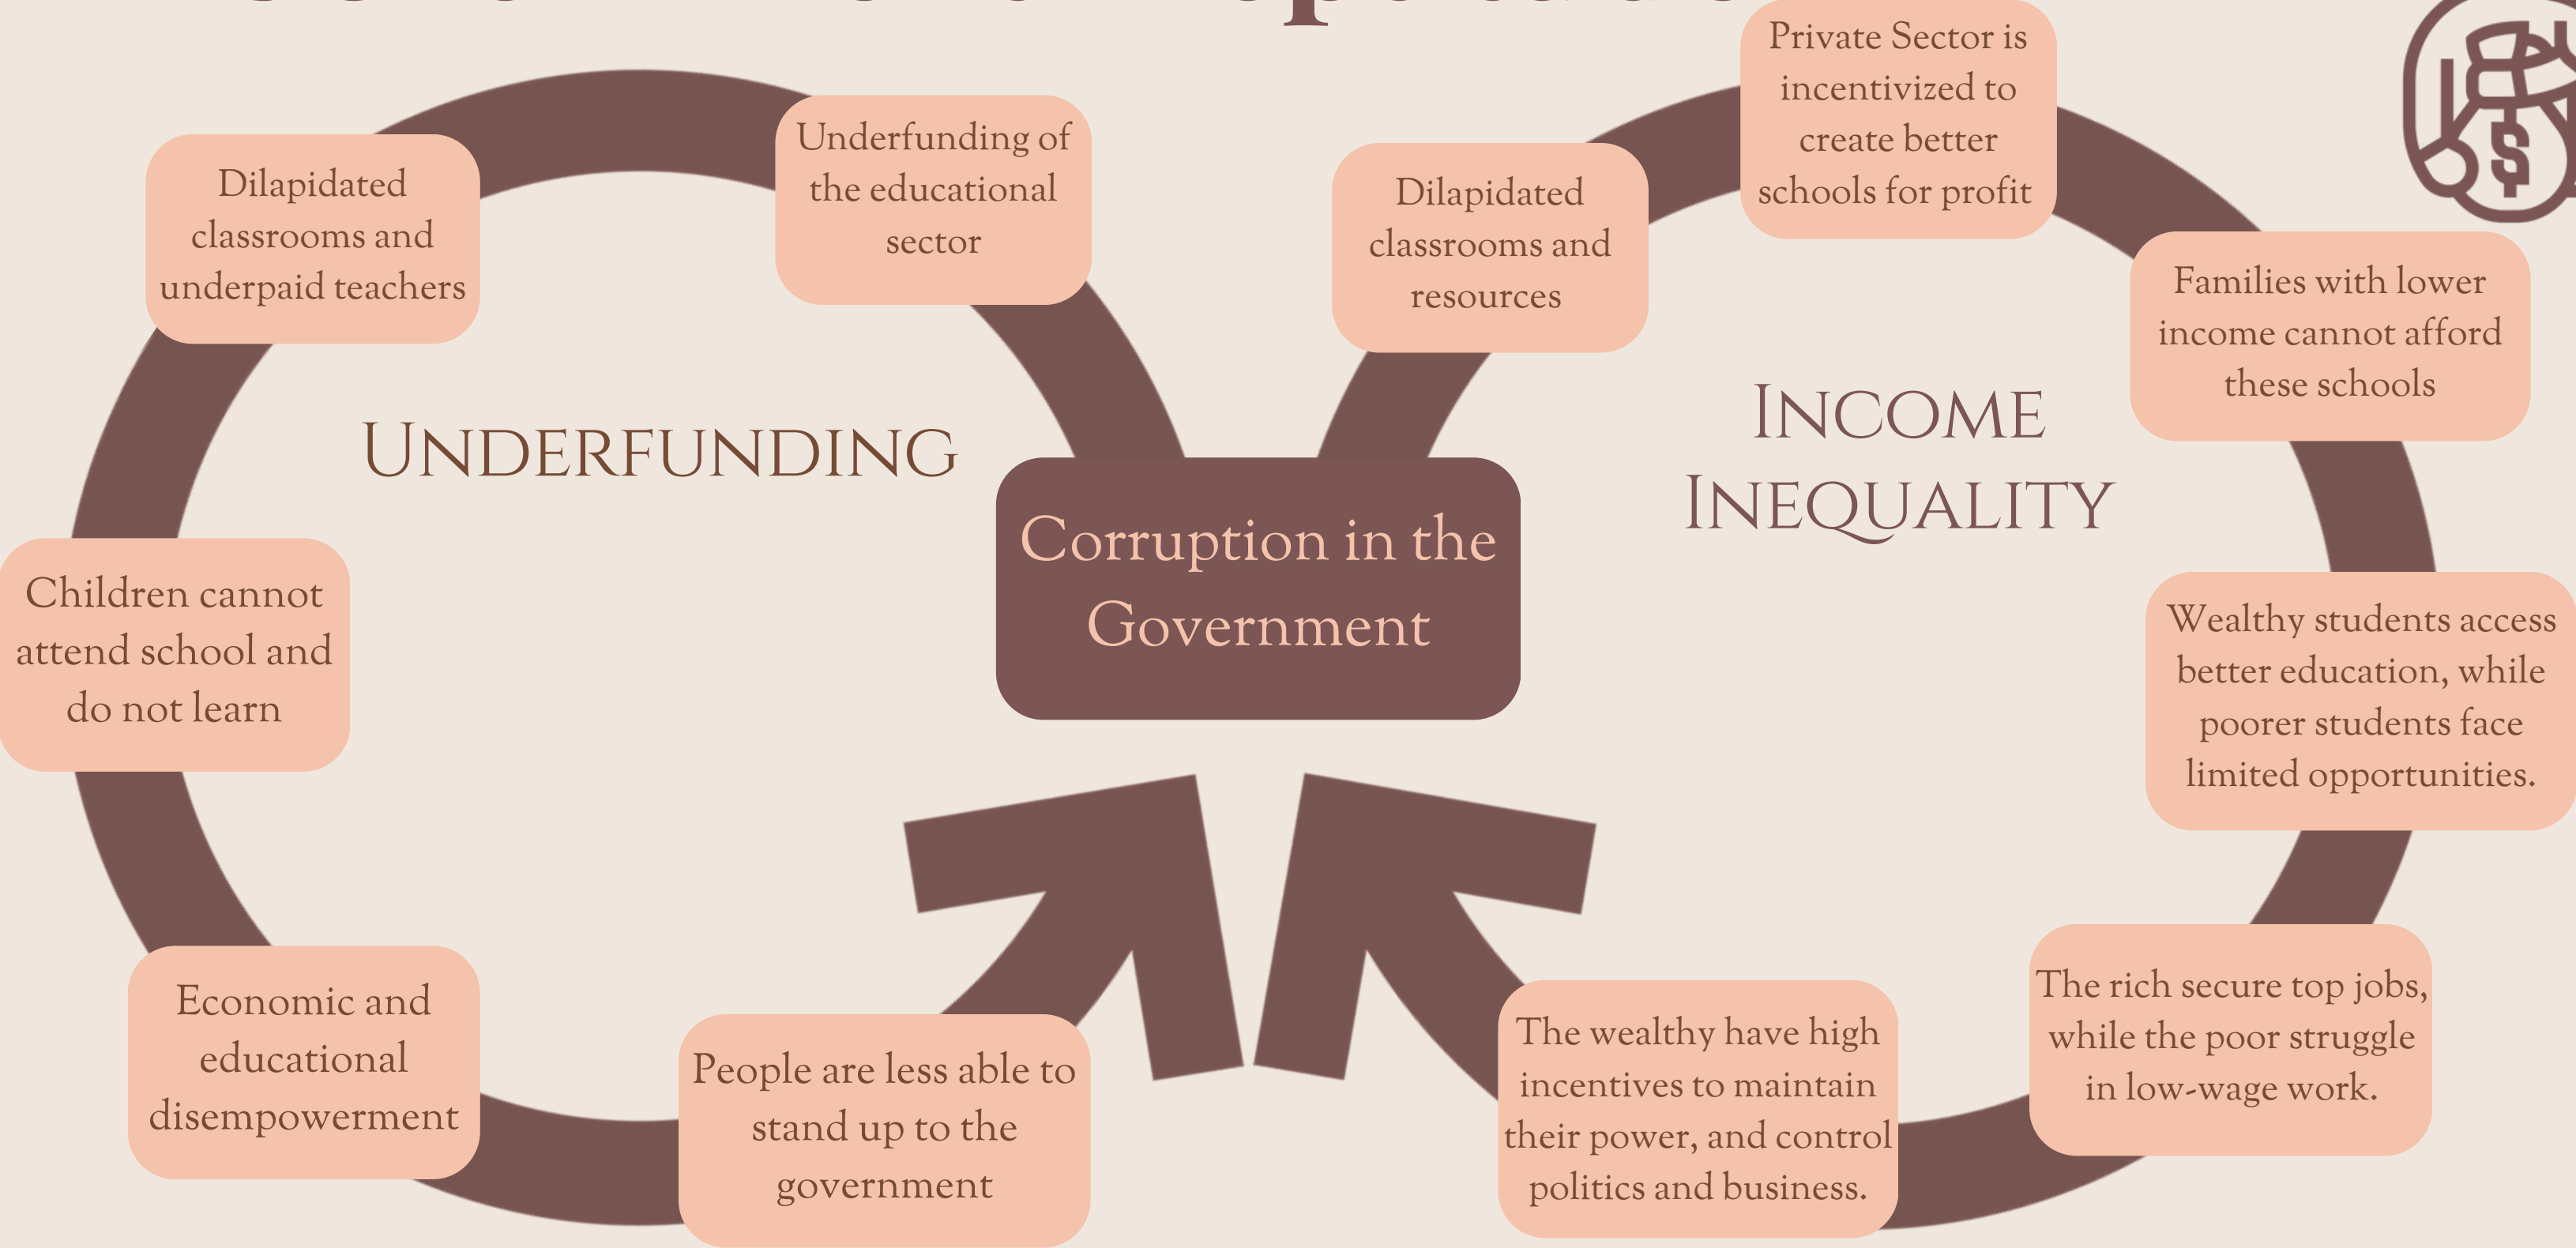

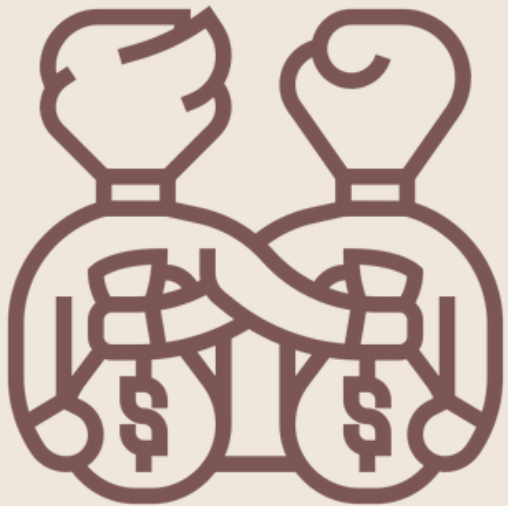

35TH
Most Corrupt
Country in the World

< 10%
Annual Education
Budget Allocation

15 - 20%
UNESCO Budget
Recommendation

Teacher shortage, dilapidated
learning resources, and, as a
result, children who can't go
to school

#2 Government Ineptitude

Barrier #3

SOCIAL AND CULTURAL BARRIERS

29%
Nigerian Children
receive Quranic
education

50%
out-of-school
children are girls

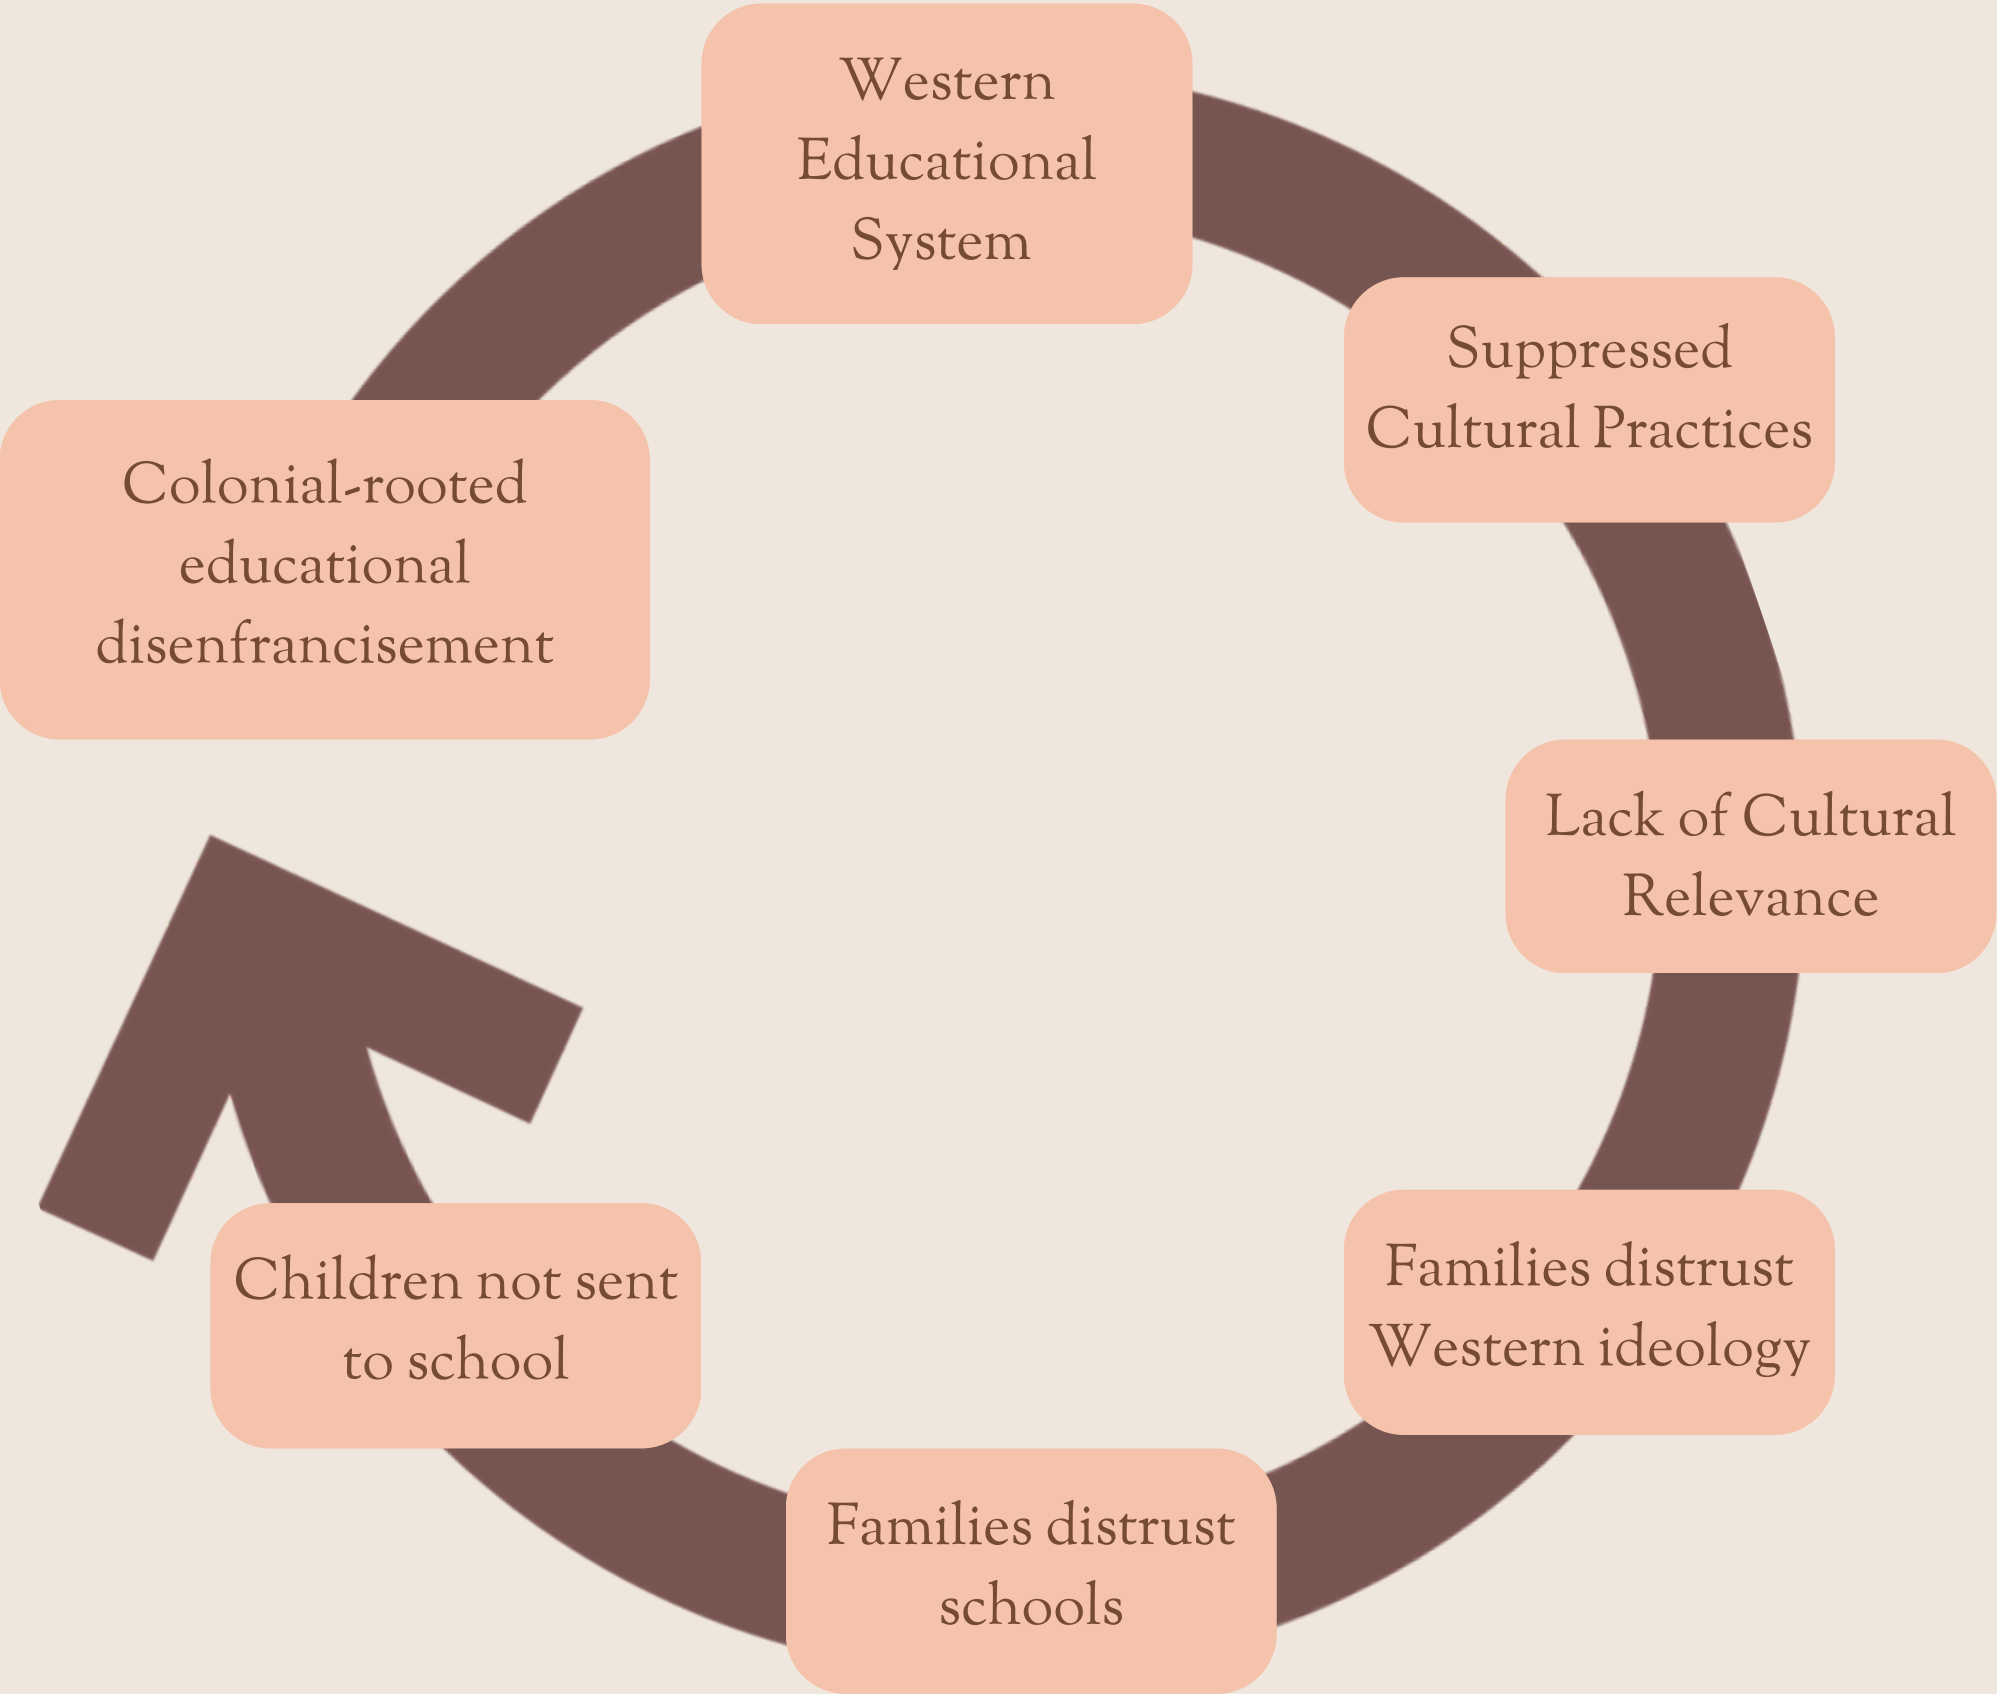

44%
girls married before
they turn 18

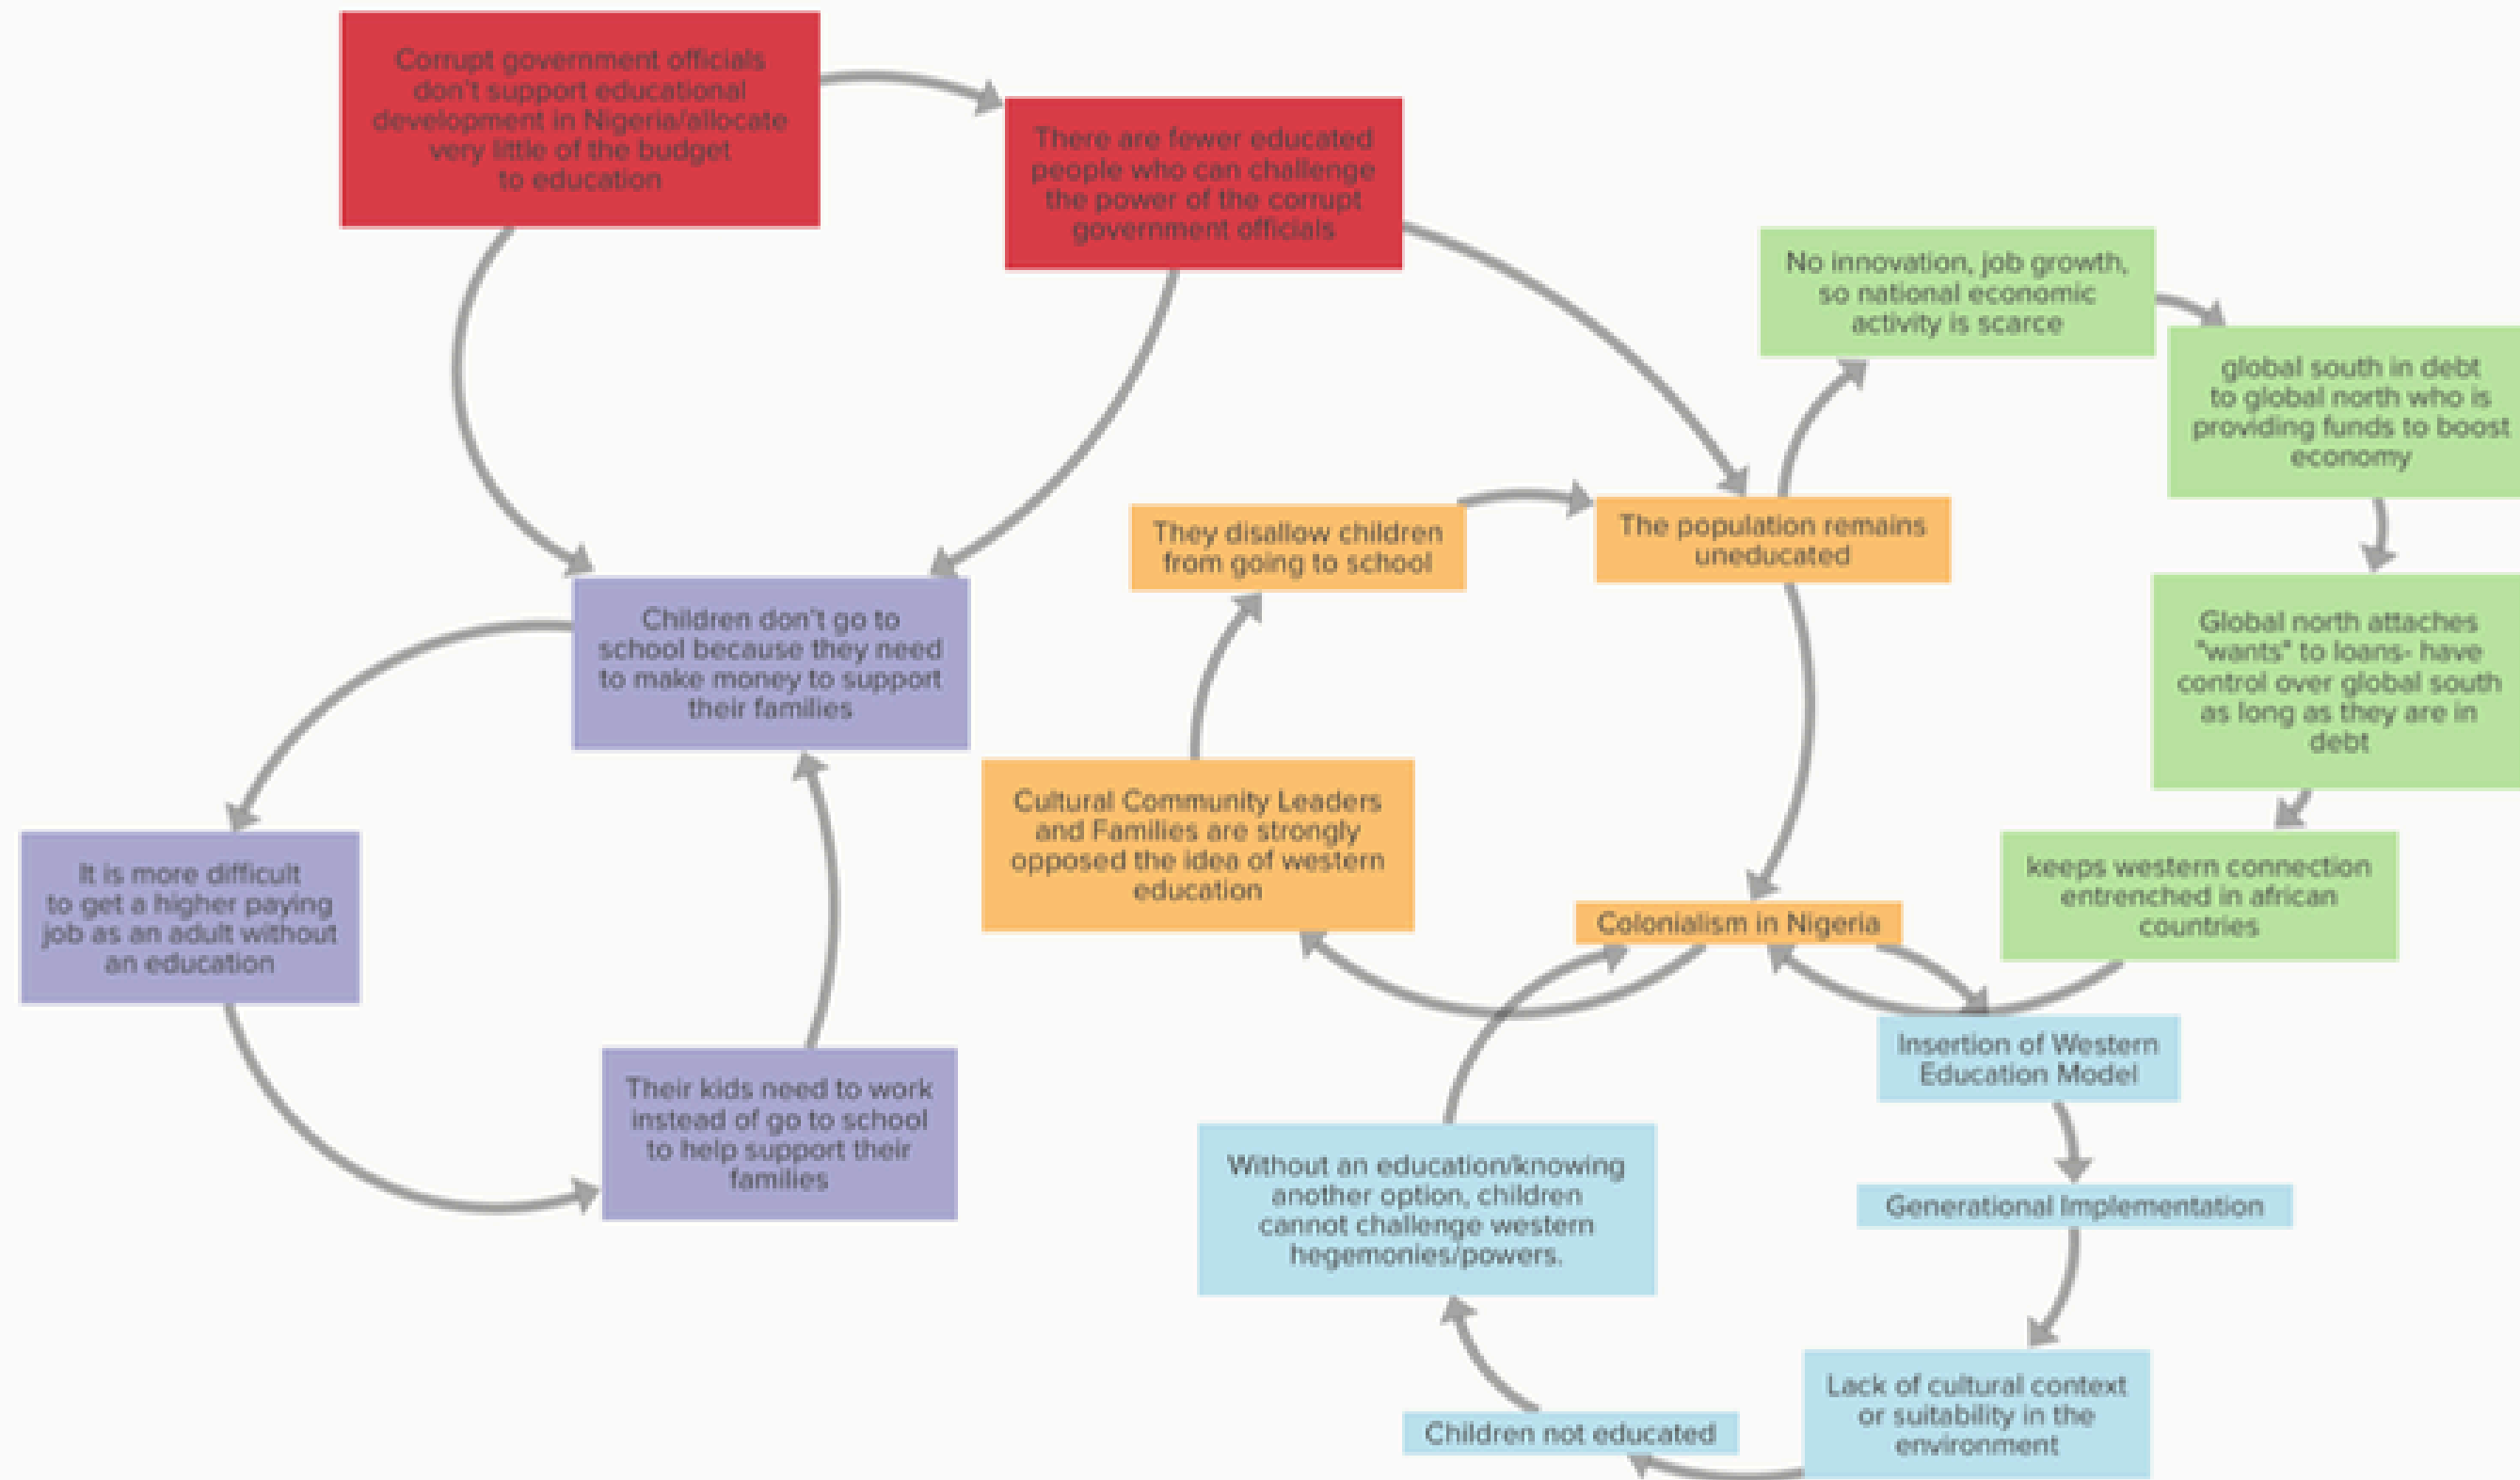

#3

Social and Cultural Barriers

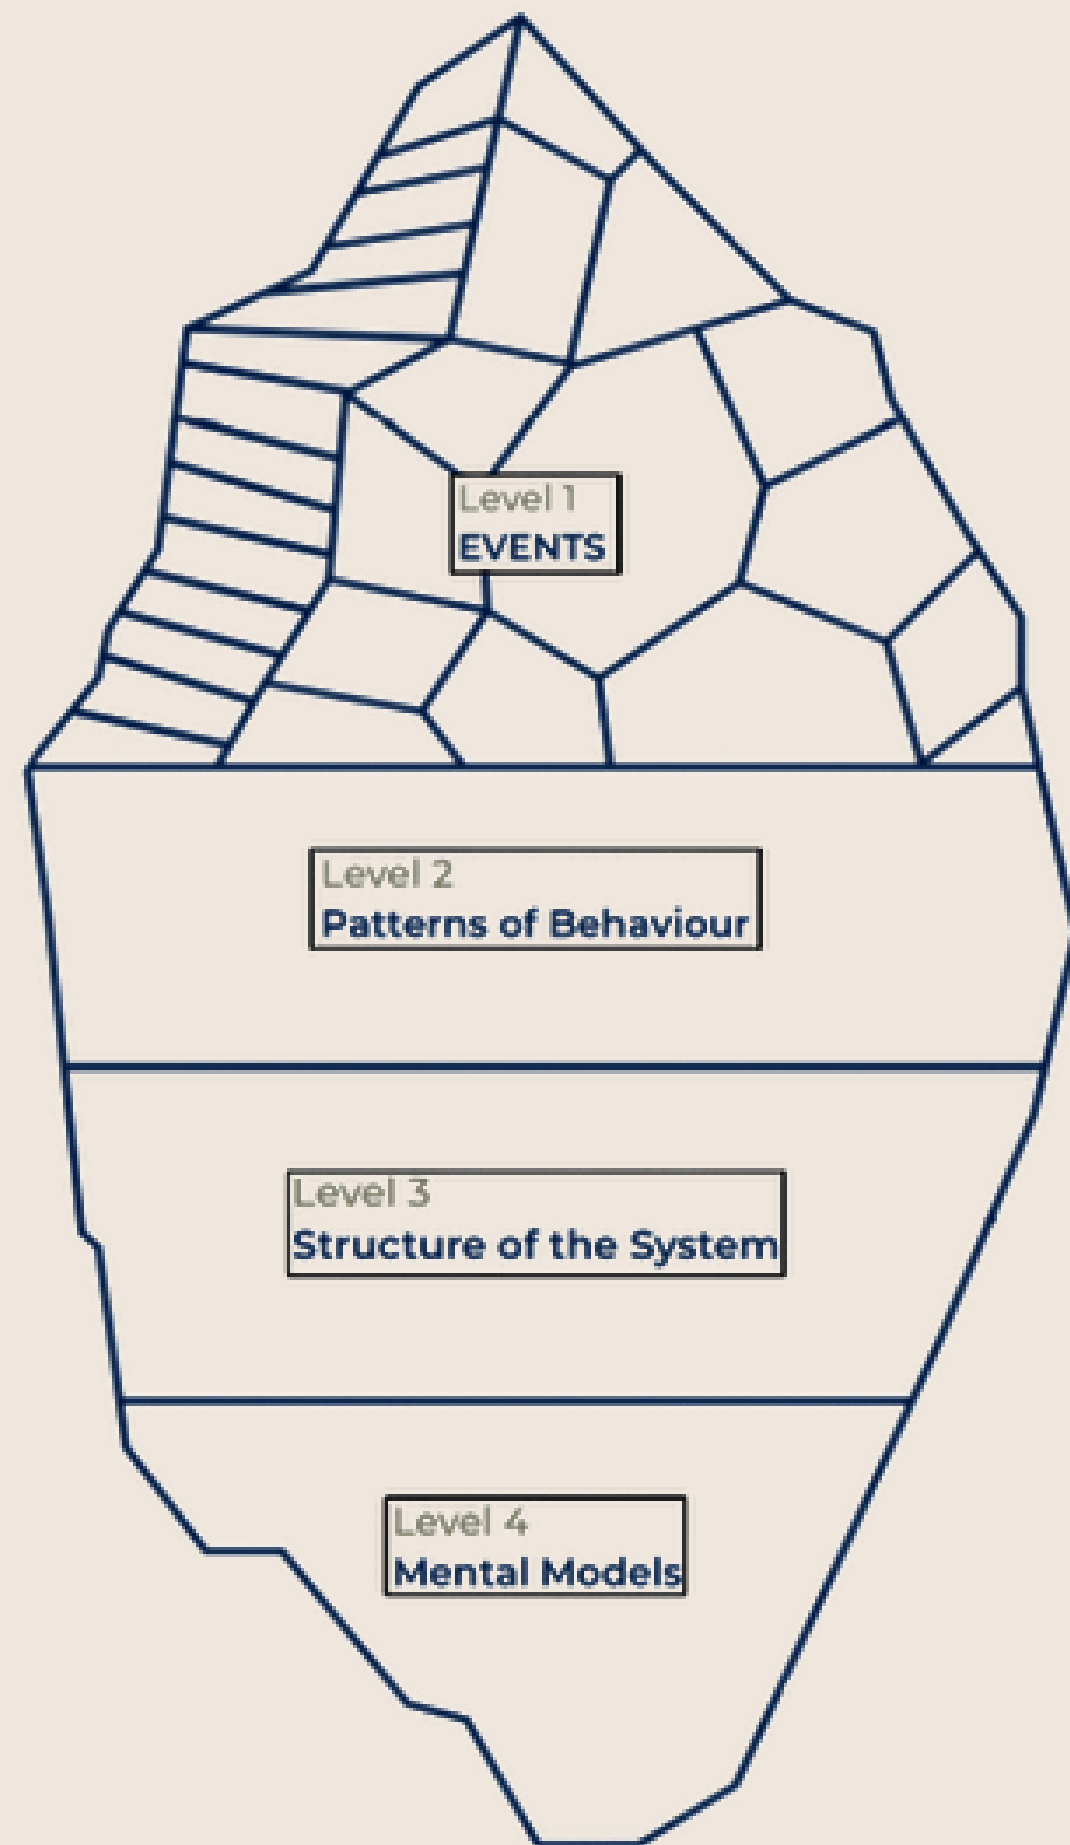

SYSTEMS MAPS

1. System Map

2. Iceberg Model

Level 1 EVENTS

- 1 in 5 students out of school
- Low literacy rates in children
- Chronic poverty over generations
- High rates of child labor

Level 2 Patterns of Behaviour

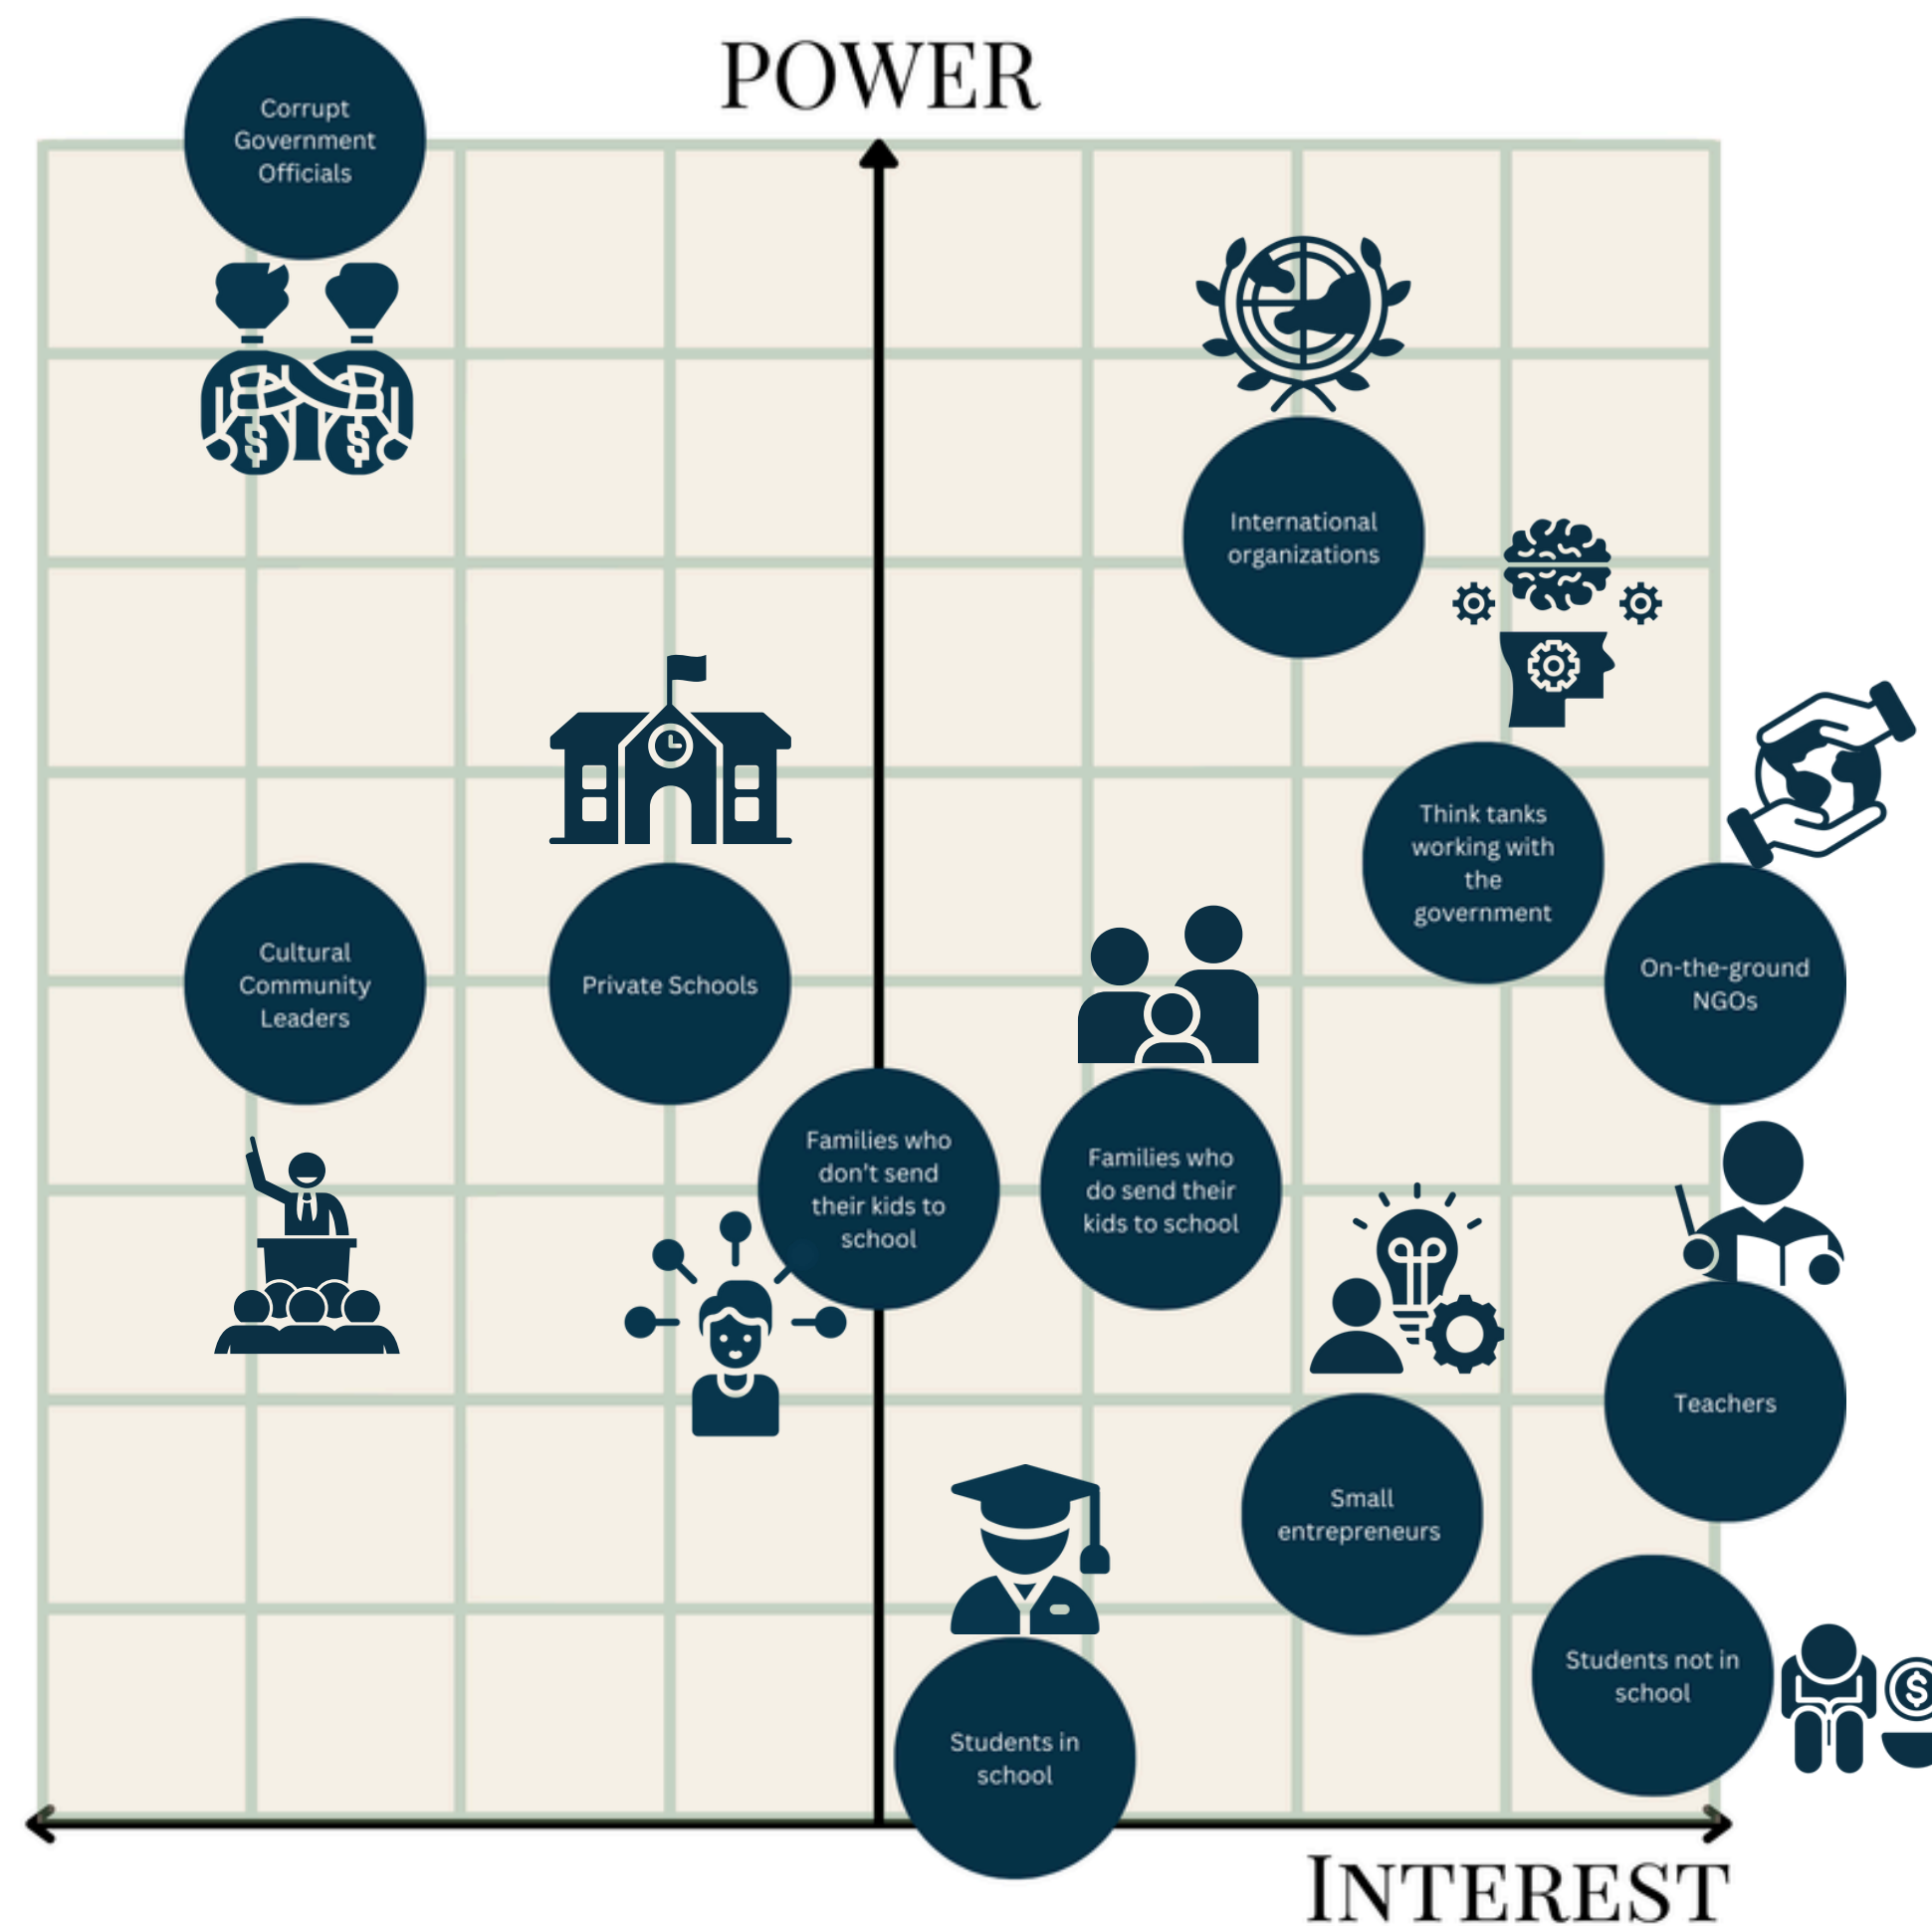

- Lack of family planning
- Post-primary education has declined over time
- Education is severely underfunded
- Families decide that working is more valuable for their children than an education

Level 3 Structure of the System

- Educational secretaries control funds for the educational sector
- Low income families benefit financially in the short-term from sending their children to work
- Increasing corruption and embezzlement of educational and infrastructural funds causes public schools to lack basic facilities
- Neo-colonial powers benefit from a lack of progress in Nigeria

Level 4 Mental Models

- Girls will become mothers and wives, so they do not need an education
- Western education should not be trusted because Western powers have been oppressive
- Public schools are not worth it
- Since poverty is so widespread, a coalition to counter the norm feels impossible
- If the population remains uneducated, then those in power can stay in power

3. Power-Interest Scale of Stakeholders

Solution Landscape

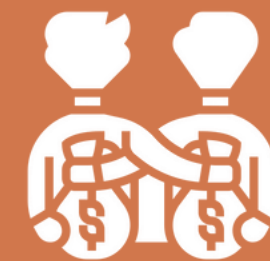

INTERNATIONAL ORGANIZATIONS & NGOS

- World Bank's Better Education Service Delivery for All (BESDA) program.
- Global Partnership for Education (GPE) financial aid.
- United Nations Office on Drugs and Crime (UNODC) Strategic Vision for Nigeria 2030
- Education Cannot Wait (ECW) initiative.
- Bridge International Academies Initiatives
- Slum2School
- Teach For Nigeria

INDIVIDUALS

- Families often take up multiple jobs to send their children to school
- Many teachers decide to stay to teach and impact the lives of their students
- National Curriculum designed and regulated by the Nigerian Educational Research and Development Council (NERDC) taught by schools

GOVERNMENT

- Universal Free Basic Education Act (UBE)
- National Social Investment Program (NISIP)
- Corrupt Practices and Other Related Offences Act (2000)
- Economic and Financial Crimes Commission (Establishment) Act (2004)
- Conditional Cash Transfer Program (CCTP)

BARRIERS

GAPS

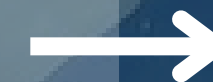

BRIDGES OF CHANGE

#1

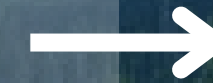

Poverty
and the Need for
Income

Aid to the government is often
siphoned and used for alternative
purposes

Giving aid to on-the-ground NGOs
working to solve the problem

Low short-term incentives for
spending money on education

Immediate reward contracts for
sending children to school (i.e. job
security, etc.)

Relief initiatives don't always
reach the most vulnerable
children

Establish a landscape analysis
to funnel funding to the most
vulnerable children

BARRIERS

GAPS

BRIDGES OF CHANGE

#2

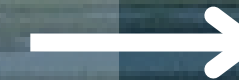

Government
Ineptitude

Current government policies are not being appropriately enforced

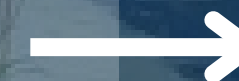

Point teams in charge of implementing policy changes

Many children remain unreached, with low career incentives for teachers to stay

Remote learning models to ensure one-to-many approach, and partnering with Teach for All

Whistleblowers are often side-tracked, ignored, or removed

More transparent system of reporting where money is spent, such as independent audits, blockchain tracking, or citizen-led monitoring

BARRIERS

GAPS

BRIDGES OF CHANGE

#3

Cultural Barriers

Educational curricula are outdated and culturally irrelevant

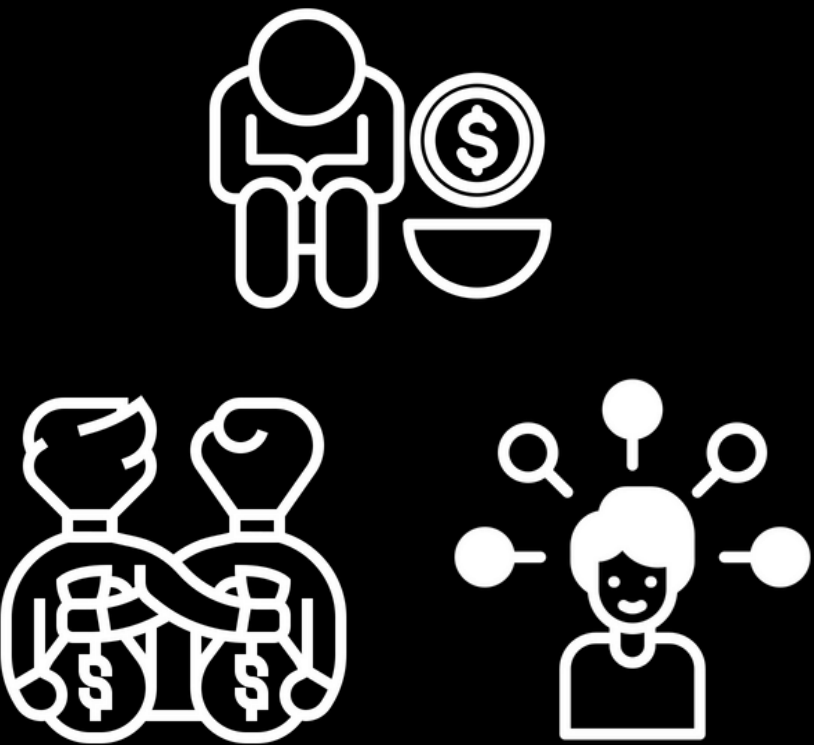

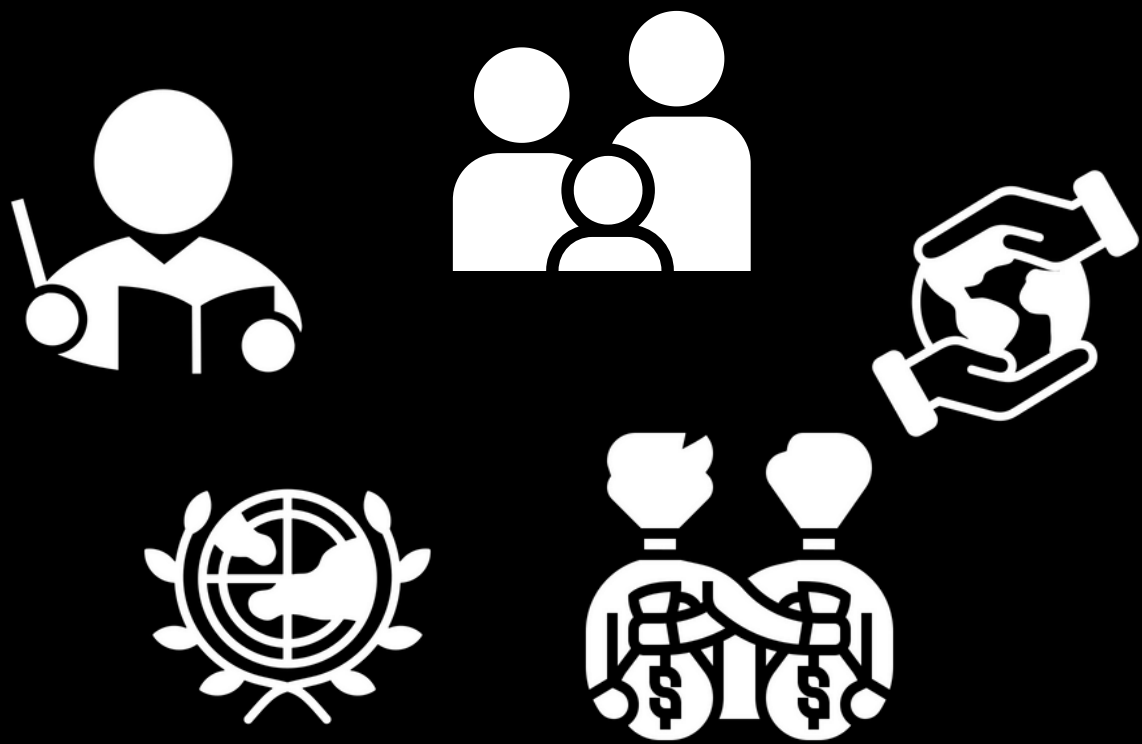

Work hand in hand with teachers to create region-relevant modernised curricula for students

Cultural leaders are often left out of solution implementation

Collaborating with local chieftains to raise awareness on the value of education
